

BUSINESS PLAN

Technical Documentation & Content Services for Temenos Banking Products

By Preetipanna Mishra

Executive Summary

This business provides specialized technical writing services for banks using Temenos platforms such as Temenos Transact and Temenos Infinity. It bridges the gap between complex banking systems and user understanding through clear, structured documentation.

Company Description

A technical writing and consulting service focused on financial software ecosystems. It delivers user manuals, API documentation, implementation guides, and training materials.

Market Analysis

The fintech and core banking software market is growing rapidly, creating strong demand for documentation services. Target clients include banks, fintech startups, and IT service firms.

Services Offered

Product documentation, API documentation, user manuals, training content, and process documentation including SOPs and compliance materials.

Marketing & Sales Strategy

Positioned as a niche fintech documentation expert. Uses LinkedIn, content marketing, partnerships, and direct outreach to acquire clients.

Operations Plan

Workflow includes requirement gathering, system analysis, drafting, stakeholder review, and final delivery. Tools include MS Word, Confluence, Postman, Swagger, and Git.

Financial Plan

Revenue through project-based pricing, hourly consulting, and retainers. Pricing ranges from ₹20,000 to ₹3 lakhs depending on scope.

Future Growth Opportunities

Expansion into SaaS documentation tools, global markets, and UX writing consulting.
