Enroll Customer

1. Log into the Spotlight application. As a Maker, search for a customer from Customer Management module to enroll.
2. By clicking on the Enroll Now button, the Maker gets navigated to the Enroll screen. Click on the Enroll button. A request will be generated and sent for approval.
3. The Maker can check all the pending requests in the My Requests dashboard with a facility to search on different criteria. To navigate to the My Requests Dashboard, the Maker clicks on the My Requests widget on the Spotlight Dashboard. The Maker clicks on a pending request to view the details.
4. There are 2 options: **Back to Requests, Withdraw**. By clicking on Back to Requests button, the Maker is redirected to the previous screen of the My Requests. If the Maker clicks on the Withdraw option, the request will be moved from the My Requests dashboard to Request History.
5. Checker logs in to the Spotlight application. The Checker clicks on the Approvals widget to view the pending requests. The Checker can view all the pending requests in the Approvals dashboard.
6. The Checker can view the details such as Contracts, Products, Limits, etc., by clicking on the Enroll Customer request.
7. There are 2 options: **Reject, Approve**, on the top right-hand side. Once the Checker clicks on **Approve**, he/she gets a pop-up message for confirmation of the approval. If the Checker clicks on **Yes, Approve**, the request will be moved from the Approvals dashboard to the Approvals History.
8. A similar screen is present for the Approvals History containing all the information about all the requests.

9. Once the request is approved/rejected, then Checker can log into Spotlight and view the Approved/Rejected (with comments) request in the Request History.
