

Connecting the World with Internet.org:

Thinking of Connecting with your loved ones free of cost, Internet.org is here. Almost two thirds of the world do not have internet access . Only 1 in 3 of total world's population have internet access. The cost of devices and services, the unavailability of the content in the local language create a barrier for all the people who are not connected via Internet. So to alleviate all these difficulties, Facebook created Internet.org, a remarkable and game changing idea.

Internet.org came into existence on August 20, 2013 in partnership between social networking service company Facebook and seven other mobile phone companies (Samsung, Ericsson, MediaTek, Microsoft, Opera Software, Reliance and Qualcomm). Their main goal is to bring affordable Internet access to everybody across the globe by increasing its affordability, efficiency, and facilitating the development of new and innovative business models.

According to Mark Zuckerberg, various technologies have been deployed to increase connectivity across the world and in no time to get free accessible content.

On February 10, 2015 Facebook and Reliance Communications launched the Internet.net Android app in six Indian states - Tamil Nadu, Maharashtra, Andhra Pradesh, Gujarat, Kerala, and Telangana. These cities will have access to various services ranging from news, maternal health, travel, local jobs, sports, communication, and local government information, all free of cost.

Even in Philippines Facebook's Internet.org app brought free mobile internet access.

And for all the event organizers here is the chance to access all the event technology websites, apps free of cost through Internet.org. This purely applies to Android users. All these apps and their easy to use nature open up a new dimension for all the Smart phone users which was an unexplored territory before Internet.org.

All the Android fans out there, access your apps and services free of cost.

Go grab your app and start enjoying the services with Internet.org.
